

Section 2

Construction Management Practices (CPs)

Section 2

Contractor Management Practices (CPs)

2.1 Introduction

This section presents the BMP fact sheets for the Contractor Management Practices (CPs). CPs predominately focus on practices relating to construction site “Good Housekeeping” measures. Other frequently used practices that address containing or capturing pollutants are also included.

This section contains the following BMP fact sheets.

CP - 01	Scheduling - Phased Construction/Clearing	CP - 12	Vehicle and Equipment Cleaning
CP - 02	Dewatering Operations	CP - 13	Vehicle and Equipment Fueling
CP - 03	Paving Operations	CP - 14	Vehicle and Equipment Maintenance
CP - 04	Structure Construction and Painting	CP - 15	Employee/Subcontractor Training
CP - 05	Material Delivery, Storage, and Use	CP - 16	Pesticides, Herbicides, and Fertilizer Use
CP - 06	Spill Prevention and Control	CP - 17	Dust Control
CP - 07	Solid Waste Management	CP - 18	Maintenance of Collection Facilities and Appurtenances
CP - 08	Hazardous Waste Management	CP - 19	Preservation and Maintenance of Existing Vegetation
CP - 09	Contaminated Soil Management	CP - 20	System Flushing
CP - 10	Concrete Waste Management		
CP - 11	Sanitary/Septic Waste Management		

Each fact sheet has a quick reference guide indicating what pollutant constituents the BMP is targeting and implementation requirements.

The BMPs presented in this section are intended to coincide with construction activity (lasting only as long as construction activities). Additional details are provided in sections covering Industrial / Commercial Runoff Management (ICP) for practices that are intended to be used for non-construction activities
